# Head of Process Development

c-LEcta is a fast growing, young biotech company based in the vibrant city of Leipzig. Our key markets are biopharma and food for which we supply customized enzymes.

To contribute to c-LEcta's growth we are seeking a committed, open-minded and communicative candidate (f/m/d) with background in Life Sciences / Biotech to lead our Process Development Team.

Would you like to be responsible for the development of biotechnological production processes and lead a corresponding team? Do you thrive in cross-disciplinary environments and collaboration with colleagues from different divisions? Do you enjoy to accompany tech transfer and scale-up projects? Then join our management team and help us to bring new innovative biotech products to market.

## Key responsibilities

- Leading and developing the process development team und the individual team members
- Development of the technological competences of the company in the field of the fermentative production of recombinant proteins and their purifications for regulated markets (food & pharma).
- Steering of external collaborations in technology development
- Close collaboration with adjacent company divisions (product development, tech transfer, quality assurance, production...)
- Design and arrangement of internal processes and responsibilities in process development
- Supporting the design of processes in tech transfer & scale-up
- Planning of hirings and investments; recruitment of new employees
- Supporting the development and execution of the company strategy

## Your benefits

- Interesting and diversified tasks in an internationally operating biotechnology company
- Fair remuneration and additional benefits
- Flexible working hours, mobile working models
- Flat hierarchies
- Opportunities for professional development and personal growth
- Team-oriented working environment

---

## c-LEcta GmbH
